

#FIX CHRONIC LYME

CHARITY RUN APRIL 26th ANTWERP

we need your support!!

#FIX
CHRONIC
LYME

On April 26th we're organising a **charity run** during the Antwerp 10 Miles & Marathon to raise awareness and collect money for research into **Chronic Lyme**.

Chronic Lyme is a multi-system disease spread by ticks. There's **no cure** yet and a lot of people are **misdiagnosed** for years because the illness is hard to identify due to lack of medical knowledge and accurate tests.

The lack of medical knowledge also entails that the illness is **not legally recognised**, meaning doctors get prosecuted for helping sick people and that expensive treatments and tests are **not refunded**, so patients have to pay up themselves.

Waiting for the government and the general medical profession to change their minds will take a long time, so we decided to start helping ourselves by **raising money for research** into this spreading disease and by bringing this illness and its problems to people's attention. The money will be donated to Himmunitas vzw. In 2015 they will participate in 4 research projects that will **benefit Chronic Lyme patients** from Belgium and the whole of Europe in a short period of time.

You can **donate and support** all the runners who give a face to everyone too ill to come out. Donations start from 5 euro already and can be made here: <https://fundrazr.com/campaigns/8vDV1>

Or you can **run along!** For more information please email: fixchroniclyme@gmail.com

For more info check our facebook and fundraiser pages, or if you have a question email fixchroniclyme@gmail.com.
